

BIOFLUX[®]

Central Venous Catheter

EBIME is a 100% Mexican company that has been characterized by manufacturing high quality products recognized worldwide.

The BIOFLUX catheter is ideal for use in intensive care, and during multiple drug delivery and parenteral feeding through the application of a single puncture.

Seldinger's technique allows a proper installation, avoiding surgery and the high costs involved. The equipment has a practical syringe with innovative mechanism to avoid extravasation or aeroembolism.

It also includes a new flexible guidewire much more resistant and with a design that facilitates the process of inserting the catheter, providing greater security at the time of installation. Due to its radio-opaque quality, it allows us to know the location of the component through x-rays or fluoroscopy. In the presentation of BIOFLUX PLUS, the equipment has needle-free connectors in each of its terminals, which reduces the possibility of infections.

For these reasons, the BIOFLUX catheter has the necessary characteristics for a quality installation in the patient.

EBIME[®]

EQUIPOS DE BIOMEDICINA DE MÉXICO S.A DE C.V

"PARA UNA MEJOR CALIDAD DE VIDA"

PERCUTANEOUS EQUIPMENT INCLUDES:

- Radiopaque polyurethane or silicone catheter with flexible tip
- Introducer needle
- 5 cc syringe with blood extravasation system
- Flexible guidewire tip in "J"
- Vascular / Venous Dilator
- Suture wings and protector *
- Injection site

Sterilized Product
with Ethylene Oxide,
Disposable, Pyrogen-free and Non-toxic
