

SMART

Catheter for Hemodialysis

EBIME is a 100% Mexican company that has been known for manufacturing high quality products recognized worldwide.

SMART hemodialysis catheters are a generation of innovative components within the EBIME catheter family.

These designs are ideal for acute treatments in homodialysis patients.

The polyurethane with which the SMART catheter is manufactured is one of the best of its kind, passing all the quality tests to which it is subjected. The catheter hub has suture wings that allow the patient to be fixed more securely, its soft and rounded tip at the beginning of the catheter minimizes the chances of causing stereosis in the vein where the component is housed. Added to this, the installation equipment contains a graduated, flexible and advanced metal guidewire that facilitates the placement of the SMART catheter.
